Homes and Apartments

The Greater Scranton area is Pennsylvania at its finest. Scranton is a modern, progressive area, offering a low cost of living, high quality of life, superior educational and healthcare systems and strong ethnic and family traditions. Numerous cultural amenities combined with short commute times and affordable, safe and clean neighborhoods make Scranton a location of choice to live and work.

Greater Scranton offers one of the most affordable housing markets on the East Coast. Executive housing here is priced 30% less than homes in Philadelphia or Hartford and 51% less than Boston or Long Island.

When searching for a place of residence, renters have a variety of options from which to choose. Whether your style is contemporary or you appreciate historic charm, apartments are readily available at affordable prices.

Unfurnished, one-bed, one-bath apartments (750 to 900 square feet) in suburban apartment complexes are typically offered for between $600 and $900 per month. Unfurnished two-bed, one-bath apartments (850 to 1,150 square feet) in suburban complexes are offered for $700 to $1,000 per month. These rents often include water, sewer, and trash removal, while some also include heat and cable TV.

Apartments located in older homes, within safe, established neighborhoods are available from $450 to $650 per month.

The cost of purchasing a new home in Greater Scranton depends upon factors such as size, style and number of bedrooms. Older homes (50 years or more), with two to three bedrooms, located on a modest size lot can be acquired for approximately $150,000. This price range also includes some fairly modern ranch homes.

Newer two to three bedroom bi-levels and split-levels in suburban locations typically are priced between $150,000 and $200,000.

Modern (15 years old or less), four-bedroom homes, on fairly large lots in suburban developments, are offered for sale for an average price of $230,000. The approximate price range for most homes in this category is $200,000 to $300,000. Total monthly operating costs for this type of home, including real estate taxes, gas heat, electricity, phone, cable TV, water, insurance, sewer, and removal of trash, will likely range from $575 to $625.

Large executive level homes often exceed $300,000.

The average, per square foot construction cost of a new home here is approximately $80, excluding the lot. The average cost to purchase a 1/2 acre, in a modern subdivision, with all utility services is approximately $40,000.

Cost of Living

The cost of living in Greater Scranton compares favorably with other small to mid-size cities in the Northeast and is significantly lower than major metropolitan areas. For example, a person making $50,000 in Scranton would need to earn more than $56,789 in Philadelphia and more than $99,174 in Manhattan to enjoy a comparable standard of living.

We've got plenty of warmth and sun in the summer, spectacular fall color, sparkling winter days and breathtaking vistas of spring flowers. In short, if you live here, you'll enjoy four well-defined seasons.

Annually, 50 inches of snowfall results in excellent skiing conditions from early December through mid-March when average temperatures are in the 30s and 40s.

Incentive Financing Programs

**Ben Franklin Technology Partners (BFTP)**
This program provides investment capital ranging from $5,000 to $250,000 for both established and early-stage technology companies to fund research and development and technology transfer. In addition, the BFTP provides referrals to local colleges and universities for training and demonstration, strategic planning assistance, access to university expertise and laboratory facilities, and equipment, legal, accounting and other business assistance.

**The Small Business Loan Program**
OECD administers the Federally Funded, Gap Financing, Loan Program, which provides loans to for-profit small businesses who are located in Scranton or wish to relocate to Scranton. Proceeds from this loan program may be used to acquire real estate; renovate business premises, including accessibility modifications/needs; purchase of machinery and equipment; and for inventory and working capital needs.

This program may provide assistance for up to 30% of your total project costs. It does not provide venture capital, nor can it be used to satisfy equity needs, pay existing debt and/or satisfy terms of a bridge loan. The interest rate is fixed for the term of the loan; collateral and a personal guarantee are required and there are no closing costs or prepayment penalties.

The primary focus of loan funding is to ensure job creation. As per HUD guidelines, borrowers must create one job for every $30,000 borrowed and at least 51% of the jobs created must be held by and/or made available to low-and-moderate income persons within a three year period of receiving funding.

An application can be found on the City’s website: www.scrantonpa.gov, on OECD’s page, or by calling 570-348-4216.

**Small Business First (SBF)**
The Small Business First loan program is designed to stimulate the expansion and assist in the retention of small businesses for the purpose of creating new jobs and retaining existing jobs in Pennsylvania. SBF provides low-interest loan financing for a portion of the costs of land, building, machinery and equipment, and working capital to businesses unable to fully finance these projects with equity, bank financing, or other private and public sources. Funding includes loans up to $200,000 or 50 percent of total eligible project costs, whichever is less. Maximum loan amount for working capital is $100,000 or 50 percent of total eligible project costs, whichever is less. Interest rate is fixed and is based on market conditions.

**Machinery & Equipment Loan Fund (MELF)**
Low-interest loans to be used for machinery and equipment acquisition and upgrading and related engineering and installation costs directly related to the business process. Loans are up to $5,000,000 or 50% of the total eligible project costs, whichever is less. Program eligibility includes manufacturing, industrial, agricultural processors, direct mining operations, information technology, biotechnology and medical facilities. Terms are up to 10 years depending upon the useful life of the machinery being financed; $25,000 cost per job retained or created. Project must be directly related to the business process. The interest rate for the loan will be fixed at the time of approval of the loan and remain fixed for the duration of the repayment term. Interest rates are subject to change based on market conditions.

**First Industries Fund**
This fund promotes the for-profit agriculture and tourism industries. Funding can be used for land and building acquisition and construction; machinery and equipment; and working capital. Loan guarantees are for large-scale projects that demonstrate regional impact; deploy new or innovative technologies; and demonstrate significant job creation. The program offers up to $500,000 or 50% of total eligible project costs for machinery and equipment, whichever is less or up to $200,000 or 50% of total eligible costs for land and building or working capital, whichever is less.
Job Creation Tax Credit Program (JCTCP)
This state tax credit program is available to businesses that, within three years from a negotiated start date, create 25 or more jobs or increase employment by 20%. Tax credit is $1,000 per full-time job, per year and 25% of the tax credits allocated each year must go to businesses with less than 100 employees. The Pennsylvania Department of Community and Economic Development decides the amount of tax credits for any project and the number of years each credit may be used.

Keystone Communities Program (KCP)
Keystone Communities is a program that assists Pennsylvania's core communities in achieving revitalization. This program supports physical improvements to both designated and other communities that are undertaking revitalization to restore deteriorated downtowns, residential neighborhoods, and industrial/manufacturing sites. Keystone communities also provides funding for accessible modifications for the homes of persons with physical disabilities.

The Four Program Designations:
- Main Street: Funding and technical assistance for a community's downtown revitalization.
- Elm Street: Funding and technical assistance for residential and mixed use areas in proximity to central business district.
- Keystone Communities Enterprise Zone Designation: Funding and technical assistance for disadvantaged industrial/manufacturing and business sites.
- Keystone Community Designation: Designation and potential access to funding and Neighborhood Assistance tax credits.

Keystone Innovation Zone (KIZ)
An incentive program that provides tax credits to for-profit companies less than eight years old operating within specific targeted industries within the boundaries of a Keystone Innovation Zone (KIZ). With a total pool of up to $25 million in tax credits available to KIZ companies annually, the KIZ tax credit program significantly contributes to the ability of young KIZ companies to transition through the stages of growth. A KIZ company may claim a tax credit equal to 50% of the increase in that KIZ Company’s gross revenues in the immediately preceding taxable year attributable to activities in the KIZ, over the KIZ Company’s gross revenues in the second preceding taxable year attributable to its activities in the KIZ. The KIZ Tax Credit is limited to $100,000 annually per KIZ company. Applications must be submitted annually.
KOZ / KOEZ Program
Eligible companies that locate in a Keystone Opportunity Zone (KOZ) or a Keystone Opportunity Expansion Zone (KOEZ) are exempt from most state and local taxes through 2022. Some of the local and state taxes from which an eligible business may be exempt include, but are not limited to:

- Local real estate taxes
- Local business privilege or mercantile taxes (if any)
- Pennsylvania’s Capital Stock & Franchise Tax
- Pennsylvania’s Corporate Net Income Tax
- State sales tax on the purchase of taxable property or services (excluding motor vehicles) that are used and consumed by businesses within the zone
- State sales tax on telephone and electric service used by a business in the zone
- State sales tax on “building machinery and equipment” purchased by a contractor in conjunction with a construction contract

If a Pennsylvania-based company is relocating an operation from a non-KOZ/KOEZ into one of the zones, then it must do one of two:

- Increase its full-time employment by at least 20% in the first full year of operation
- Make a capital investment in the zone equal to at least 10% of the gross revenues of the business in the preceding calendar or fiscal year

A business relocating from outside Pennsylvania into a KOZ/KOEZ must simply own or lease property in a zone from which it actively conducts a trade, profession or business.

Workforce Investment Act (WIA)
On-The-Job Training (OJT) is a specialized type of training, designed primarily for use with either public or private employers. Essentially, when an OJT Contract for employment is initiated with a specific employer, the customer, or job seeker, becomes the employee of the designated company or organization. The company pays the employee at his/her full hourly wage and provides all benefits as applicable. The employer then provides the number of hours the employee worked, on monthly basis, to the Workforce Investment Act Fiscal Agent through an invoicing made in accordance with a pre-signed OJT Contract, based on up to 50% of the employee’s stipulated wage of the initiated contract period. Customarily, the length of a contract period is determined by the type and/or intricacy of training required, wage level, number and type of benefits, etc. and usually is drawn for two (2) to four (4) weeks in length. Longer term extended contracts are granted only in cases of extremely difficult training situations and inflated wage rates. Final determination of contract length lies with the Fiscal Agent Executive Director.
